

# F30 Swing-Down-Slide

LMD Fire Rated Metal Ceiling acc. to Din 4102-2

The ceiling elements – with or without mineral wool – are positioned in G-profiles. They can be individually swung down and slid by means of a dismantling tool – no additional ceiling void is necessary. Up to three ceiling elements can be moved together to receive a large inspection opening. Thanks to an adjustable wall connection, an excellent compensation of tolerances on the wall is possible. Stable hinging hooks offer maximum security against unintended lifting.

- freely spanned construction
- very good compensation of tolerances on the wall is possible due to an adjustable wall connection
- swung down ceiling elements can be moved together to receive a large inspection opening (approx. 2,500 x 2,000 mm)
- maintenance option due to ceiling elements that can be individually operated, swung down and slid
- no additional ceiling void is necessary for maintenance works
- hygienic and easy to clean

# **Technical data**

Material	galvanised sheet steel
Weight	38 - 42 kg/m²
Serviceability	swing-down and slide option or removable
Wall connection options	plasterboard barrier, plasterboard frieze, plasterboard partitions, bracket fastening, massive walls, concrete walls

# **Component list**

1	metal ceiling element
16b	U-washer
27a	G-profile 68
150	L-wall profile 43x65
278b	truss head screw with square neck and nut
811b	GKF/DF pre-cut 18 mm

Loudspeakers	Monacor SPE-150/WS - Low installation loudspeaker ic audio DL EN54 - ELA loudspeaker for voice alarm
Protective boxes	SK30 - Protective box for built-in part round/square
Ventilation components	<u>Strulik BCF - Damper</u> Wildeboer BV90 - Fire protection valve (Series BV92) Trox L-KU-K30 - Fire damper

# **Application examples**

## **Project solutions**

This product data sheet refers to the standard version of the product mentioned above.

We would be happy to work with you to find the right solution for your project. Adapted to your building project, you will receive a perfectly matched system. Project-specific constructions and adaptations can be found in the offer documents.
